2 different types of banner available:

### full-colour printed banners

Printed banners use eco-solvent, fully waterproof and scratchproof inks printed onto a selection of materials:

- Heavy-Duty Banner Vinyl - smooth, matt finish, fire retardant (BS fire certificate available on request) reinforced banner PVC vinyl (550gsm)
- Textile Banner Vinyl - lightweight, non-reflective, fire retardant (BS fire certificate available on request) reinforced, textile effect banner PVC vinyl (250gsm)
- Mesh Banner Vinyl - extremely lightweight fire-retardant (M1/B1 rated) PVC vinyl, 50% lighter than heavy-duty banner vinyl (275gsm). Ideal for cross-street banners and building wraps

Mesh vinyl consists of 25% small holes throughout its surface area allowing continuous air-flow and light through it making it the ideal choice for building wraps

Prices inclusive of setting-up, printing, hems & eyelets and based on finished artwork being supplied with order. Alternatively, our own in-house design studio can create designs for you (please refer to page 194 for details and prices).
