

Linear Print Options

Heavy Duty Banner Vinyl

550gsm heavy duty banner vinyl with super smooth, scratch resistant, waterproof surface

2880dpi photographic quality print using 6 ink colours

Ideal Applications:

One finish fits all - This is our most popular finish because its robust, hard-wearing finish gives a high quality print that'll last for years and years.

Extremely good value-for-money and highly recommended.

Linear Display with 3mm Forex printed panels

Opeljet Film

360Mic thickness Opeljet film with anti-glare front coating, anti-curl lining & white backing

2880dpi photographic quality print using 9 ink colours

Laminate anti-scuff protective layer in crystal (recommended), matt or gloss finish

Ideal Applications:

Long-term use where the very best quality printing and finishing are required.

The laminate protects the print from knocks, scratches and spills producing a stunning image for years to come.

Highly recommended where a truly professional finish is essential.

Linear Display with 5mm infill Forex printed panels

3mm & 5mm Forex Board

Lightweight 3mm or 5mm rigid PVC board with full colour printed self-adhesive vinyl and laminated anti-scuff protective layer applied (matt or crystal finish)

2880dpi photographic quality print using 6 ink colours

Ideal Applications:

Fabulous colour reproduction for photographic prints with anti-glare finish. Forex panels are extremely durable for any application. Easy to fit and ideal for portable and permanent displays

Extremely good value-for-money and another favoured choice.
